

CDI - 3D Design Modeler - FOOTWEAR - W/M

[Apply Now](#)

Company: Salomon

Location: Annecy

Category: other-general

Job Description

Duration:Permanent contract.

Location:Annecy, France.

Salomon, a global leader in the sports and outdoor industry, is seeking a talented D Design Modeler to join its dynamic creative team. As a D Design Modeler, you will have the opportunity to work on innovative products and contribute to the evolution of the Salomon brand.

Responsibilities:

Creating D models and digital samples based on D design research.

Adapting the modeling workflow according to the maturity level and difficulty of the request.

Generating photorealistic renderings using various artistic styles.

Creating virtual scenarios.

Providing precise models of the elements that compose the product model.

Ensuring perfect file management based on their final destination: simulation/optimization, animation, virtual reality, augmented reality, pack design.

Main missions:

Influencing, advising, and challenging project group members by demonstrating through D

visualization the necessary elements to respect the design intent, performance constraints, and industrial requirements.

Supervising technological research on D rendering.

Training, monitoring, and educating design team members on D modeling.

Enhancing the skills of D partners (CAD, modelers, D artists, etc.).

Leading and coordinating the execution of the digital transformation strategy action plan.

Coordinating, in the form of a working group, the validation and successful completion of the digital product before the design and development validation stages.

Qualifications

Required Experience: 5 to 10 years of experience in D modeling and project management.

Education: Bachelor's degree (Bac +) or Master's degree (Bac +) in Digital Design / Digital Art / D Design preferred.

Languages: Fluent in English (written and spoken), French is a plus.

Specific Skills:

Ability to interact with design, marketing, R&D, industrialization, CAD, and pattern-making teams.

Proficiency in: Microsoft Office, Modeling and rendering tools (Substance D, Blender, and Rhinoceros D).

Knowledge in computational design would be a plus.

Cross-functional Skills:

Self-confidence.

Decision-making / discernment.

Initiative.

Commitment/motivation in work.

Communication skills.

Ability to form and lead teams.

Assisting in the development of others.

Organizational and planning skills.

Strong communication.

Critical eye and analytical thinking.

Interest in the product (sneakers).

Proposal strength in shoe technique.

Ability to translate technical data.

Conceptual eye.
