

Senior Data Scientist (Digital & Data)

[Apply Now](#)

Company: Coders Connect

Location: Paris

Category: computer-and-mathematical

Coders Connect and Sanofi are joining forces to bring an electrifying twist to the biopharmaceutical world! Work with a rhythm that suits your style (2 days remote and 3 days onsite magic). Language: Proficiency in English is required for this role to ensure effective communication within our diverse, global team. About Sanofi: We're not just a company; we're a global movement, focused on human health and making a real difference. Our mission? To battle pain, ease suffering, and sprinkle a little bit of magic in the process by developing life-changing medicines and vaccines through breakthrough science and wizard-level technology. Digital & Data: The Pulse of Our Mission At the heart of our quest lies our digital and data powerhouse. Think of us as the digital healthcare platform of your dreams, where innovation meets speed, and technology shakes hands with medicine. With our scale, deep-rooted connections in health ecosystems worldwide, and a knack for pushing boundaries, we're here to revolutionize medicine, one digital solution at a time. The Role: Data Scientist Wizard As a Data Scientist at the helm of our Digital R&D, you'll wield your analytical magic to blaze trails in new drug discovery and make clinical trials more efficient than ever. Your mission is to decode complex data, craft predictive models, and pioneer AI-driven solutions that will shape the future of healthcare. Requirements Your Quests: Collaborate with visionary teams to translate business needs into technical quests. Harness machine learning, statistics, and optimization to cast spells over AI projects, turning data into groundbreaking solutions. Conduct ML experiments and evolve production-ready models into digital elixirs ready to transform patient outcomes. Weave data analysis, visualization, and storytelling into the fabric of our mission, defining and delivering AI-powered data

products. Partner with a league of extraordinary developers, engineers, and MLOps to deploy AI/ML solutions that are nothing short of magical. You Are: A trailblazing Data Scientist ready to challenge conventions and make significant strides in AI solutions. With a knack for deploying AI/ML solutions through robust, state-of-the-art algorithms, you're a leader, an influencer, and a visionary eager to explore new frontiers in healthcare. Your Arsenal: Proven mastery in deploying models and developing production-ready software under agile methodologies. A history of applying ML/deep learning to solve complex, molecule-related conundrums. An expert in Python, R, Scala, and database systems, with a talent for navigating cloud and high-performance computing environments. A comprehensive skill set across supervised and unsupervised learning, deep learning, time series forecasting, and beyond. The Reward: Join a mission-driven alliance that's shaping the digital future of healthcare. Dive into a culture that values diversity, inclusion, and the collective power of different perspectives. Engage in work that's as challenging as it is rewarding, offering endless opportunities for growth and impact. Be part of the movement driving better health outcomes, better science, and better medications across the globe. The Call to Adventure: If you're ready to join a quest for better treatments, better outcomes, and better science and believe in the magic of bringing diverse talents together to make miracles happen, we want you. Let's embark on this journey together and transform the future of healthcare. Better is out there. Are you ready to find it with us?
